

Below is the list of 26 allergens found in perfumery materials. I have included their INCI name, the number assigned to them (CAS – Chemical Abstracts Service), their origin, and then the essential oils where they are found, that I use in my products. The limits of 0.01% (rinse off products) and 0.001% (leave on products) were set. I have listed all **POTENTIAL** occurrences. (Essential oils that carry a higher quantity of allergens are limited in their usage through the CPSRs that are a legal requirement when selling any cosmetics. This reduces the risk to the consumers – I include all potentials to reduce that risk further, even if there are none present.)

INCI Name	CAS Number	Origin	May be found in these Essential Oils used by Handmade Haven	Handmade Haven Products
~ Alpha-Isomethyl ionone (Aka 3-Methyl-4-(2,6,6-trimethyl-2-cyclohexen-1-yl)-3-buten-2-one)	127-51-5	Synthetic	N/A	N/A
